

CITY OF ASTORIA

REQUEST FOR QUALIFICATIONS (RFQ)

16TH STREET WATER TRANSMISSION MAIN PROJECT

The City of Astoria (City), Oregon, is issuing a Request for Qualifications (RFQ) from qualified firms (Proposer) with demonstrated experience in the design of transmission waterline improvements. To be considered, interested parties must submit their Statement of Qualifications (SOQ) in accordance with the requirements set forth in the RFQ.

SOQ packets for the 16th Street Distribution Waterline Project will be received up to the hour of 2:00 p.m. on October 20, 2022, by Jeff Harrington, Public Works Director, City of Astoria, at his office, third floor, City Hall, 1095 Duane Street, Astoria, Oregon 97103.

In general terms, the project includes the design of approximately 1,400 feet of replacement distribution waterline located within the 16th Street right-of-way between James Street and Jerome Avenue. The new waterline will replace an existing 18-inch cast iron line built in 1895. The existing waterline is located in a tunnel and the new line is anticipated to be directionally bored for the majority of the pipe length.

The request for SOQ document may be reviewed and/or obtained from the Public Works Engineering Division, first floor, City Hall, 1095 Duane Street, Astoria, Oregon; Phone (503) 338-5173. All firms who intend to submit an SOQ must register as prospective proposers with the Public Works Department. Standard selection criteria include but are not limited to project understanding and approach, availability, ability to meet project schedules and experience.

No pre-submittal meeting is planned for this project.

SOQ's received after the above specified time will not be considered. The carrier, including the United States Postal Service, is considered an agent of the proposer.

By: Jeff Harrington, Public Works Director
